Connecting AWS EC2/Lightsail with Filezilla [Ubuntu]

Suryaveer Singh   Nov 21, 2018 · 1 min read

Step 1: Download **.pem** file from AWS

Step 2: Download **putty-tools**

> sudo apt-get install putty-tools

Step 3: Convert **.pem** file to **.ppk** using following command

> *puttygen my.pem -O private -o my.ppk*

Step 3: Open Filezilla and go to

File > Site manager

Now add New site with following details

Host: Your Public IP address

Port:22

Protocol: SFTP -SSH File Transfer

Logon Type: Key file

User: user name of your machine (like: ubuntu,ec3-user etc)

Key file: select the my.ppk that you have generated in Step 3

That's it Click on connect :)

Ubuntu   AWS   Lightsail   File Transfer   Filezilla
